

A Revolution in AHU Selection Software

Win the Race to BOD

In custom AHU sales, when a rep starts working on a new project with an engineering consultant, the clock starts ticking, and BOD (basis of design) is the name of the game.

Manufacturers who respond first with selection, schedule and a guide spec that meets project requirements will end up as BOD 80 to 90% of the time.

Kinetix Air can help you get selected BOD by accelerating your design, selection, validation and bill of materials process – allowing you to produce complex designs in hours instead of days or even weeks.

Why Choose Kinetix Air

Deliver designs in hours instead of days to win BOD

Fast ROI by saving 20 hrs. per design and increasing win rate

Deploys in 30 days vs. 360 days on average for on-prem software

Components from Over 150 Top Manufacturers

Kinetix Air puts the highest quality components from leading manufacturers at your fingertips, and we're adding new lines regularly. Our API-driven integrations make it quick and easy to add new lines and listings up-to-date.

By The Numbers

-85% Level of effort per AHU

100% Reduction in human error (post initial design)

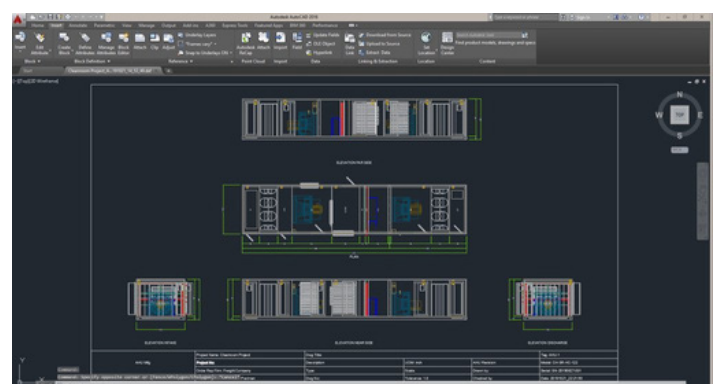

90% Faster deployment and configuration

Kinetix Air Helps Unblock Your Sales Logjam

Kinetix Air is a next-generation, cloud-based AHU selection platform that helps manufacturers accelerate design and automate validation, BOM and pricing to allow their sales application engineers to respond to requests for design in hours instead of days and weeks and win the race to BOD.

Our AWS cloud-hosted SaaS software provides a fast, reliable, secure and private platform that finally brings selection software out of the 90s and into the 21st century - offering the kind of smart, efficient, connected toolkit SAEs need to respond to requests for design quickly and iterate smoothly.

- Initial design (accelerated by +80%)
- Validation (100% automated)
- Bill of materials (100% automated)
- Pricing (100% automated where appropriate)

With Kinetix, your SAEs can focus on AHU design rather than entering and re-entering data into a series of different tools, spreadsheets, and documents -saving valuable time and eliminating costly errors.

Accelerate Your Business and Boost the Bottom Line
